

Clue 19: Yoke

Child's Play Charity

The Geek-A-Long (GAL) supports Child's Play Charity, which provides games and consoles to children in hospitals and domestic violence shelters. The sample blanket and/or sweater made by Lattes & Llamas is auctioned off at the annual Child's Play Charity gala in December each year. Additionally, GAL participants donate to CP Charity throughout the year via our [sanctioned widget](#). There is no required donation, but we encourage you to donate a few dollars in lieu of paying for this pattern. No donation is too small!

All rights reserved. You may not sell, redistribute, or publish this pattern. This pattern is for personal use only. However, if you wish to sell your Geek-A-Long Sweater or an item made using this pattern for the benefit of Child's Play Charity, please follow the guidelines set forth by CP Charity to ensure that 100% of the proceeds go to CP Charity. If you use one of the color charts featured on this sweater in one of your designs and wish to share it with others, it must be free and Lattes & Llamas must be given appropriate credit along with a link to our website and the [Child's Play Charity Widget](#).

On Board Sweater: Clue 19

This section is optional. Depending on how long you want your yoke to be, you can include it or skip it at your discretion. The next section will begin the Yoke decreases, and those will be worked until the yoke is complete. **Not including the 8 rows in this section** there are 34(44, 44, 54, 64) **64(74, 84, 84, 94)** 104(104, 114, 124, 124) rows remaining in the yoke (The next 3 clues will each cover 8 rows, and the 23rd clue is a 10 row repeat that you will work a number of times based on your size). Measure your raglan length from collar bone to underarm to determine how tall you want your yoke to be. Use your gauge (take it on the actual sweater, don't rely on your gauge swatch at this point) and convert that length into target rows. If the number of rows you are targeting is greater than the number of rows shown above as remaining for your yoke, then work these charts. If your target number is smaller don't sweat it, you can work that final 10 row chart fewer times than instructed, but if you want to ADD length to the yoke, do it here by working these charts.

Right side rows: Work chart 2A, then 2B, then 2C. Repeat across. Note that not all sizes will end on Chart 2C on a RS row. Just repeat the 3 charts across to the end. When starting a WS row, make sure to start on the chart that was worked last on the prior RS row.

Wrong side rows: Work charts in the opposite order of the right side rows.
